DETAILED ACTION

The finality of the action mailed 4-22-05 has been withdrawn in view of the rejections below. The examiner apologizes for the delay in prosecution.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the door having a different shape from the aperture or not fully coving the aperture as recited in claims 11, 14, 21 must be shown or the feature(s) canceled from the claim(s). The examiner notes that support for these limitations are found in the specification (page 6 line 19) but there is no corresponding figure. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 14 is objected to because of the following informalities: In line 4 of the claim there is a lack of antecedent basis for "the sharing sheet". It appears that this should read --the at least one sheet--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by 3,207,301 to Sparks. Sparks discloses at least one background sheet (22) having at least one background design (the cups 25 provide a design). Sparks further discloses at least one sheet provided with a drawing space (inherently provides space for drawing, see free or blank space on the sheet 15) and an aperture (18) that exposes at least one background design. Sparks includes a door (12, serves the function of a door that selectively covers portions of the apertures. See figure 1- door in closed position and figure 3- door in open position). Regarding the limitations of the door being "formed by cutting a piece of said at least one sheet and leaving a portion attached to said at least one sheet", this has not been given

patentable weight because the claim is drawn to a product and as such the process steps are not germane to the issue of patentability of the product.

Regarding the limitations of the preamble (which recites "A book"), this recitation has not been given patentable weight because it has been held that the preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v Robie*, 88 USPQ 478 (CCPA 1951).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over 3,207,301 to Sparks. Sparks discloses all of the elements of the claims including the background sheet (22), a sheet provided with drawing space and an aperture (15) and a door (12). In the event that it is deemed that cups 25 do not provide a background design (as provided in rejection above), it would have been obvious to one having ordinary skill in the art at the time the invention was made to

incorporate indicia or designs on the sheet (22) for the purpose of making the package more appealing.

Allowable Subject Matter

Claims 11 and 21 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and was not used to reject any claims in this office action.
